

Double Spiral Weave

Thread on four core beads, then one group of pattern beads. Run the needle back through the core beads from first to last added, then tighten to form a ring. Add another set of pattern beads, then run the thread in the same manner through all the core beads again. Tighten the thread. Push one set of pattern beads to the left of the core bead, and the other to the right of the core beads.

Now add two core beads and one set of pattern beads. Run the thread into the fourth core bead down and then up through all four core beads. Push the added pattern beads to the left over the first left segment of pattern beads. Now add another set of pattern beads and run the thread into the fourth core bead down. Make sure this added segment of pattern beads sits on top of the segment you previously pushed to the right. Tighten the thread.

TWO ADDED CORE BEADS
