

BASIC TWO-LADDER HERRINGBONE STITCH

				
				
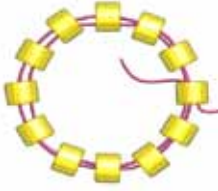

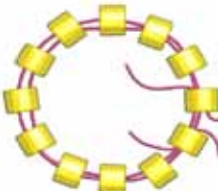

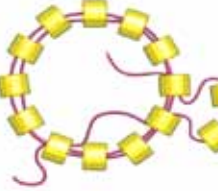

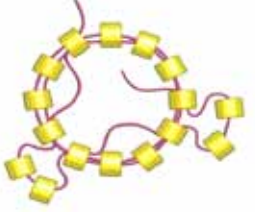

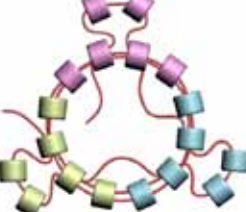

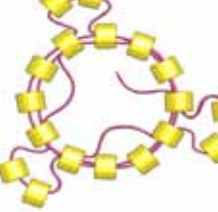

1 Start with eight beads; make a ring by going through the first bead added	2 Pick up two beads and go through the next bead on the ring	3 Skip two beads on the ring (green dot) and run through the next	4 Pick up two beads and go through the next bead on the ring	5 Skip two beads and run through the next bead (the first bead of the ring of eight, colored green)

				
				
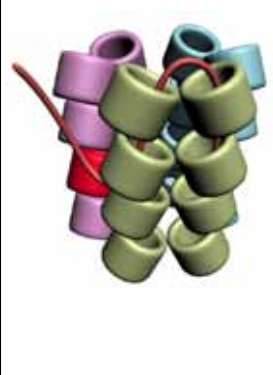

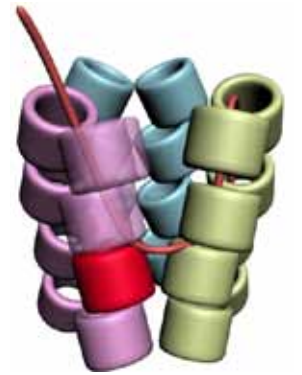

6 Tighten the thread; the two ladders will begin to be perceptible	7 "Step up" by running the thread through the first of the two bead pair added in step 2	8 Envision two ladders, though you may be using only one color. Pick up two beads, go through the next bead on the same side of the ladder	9 Run the thread through the top bead on the opposite ladder	10 Pick up two beads, run through the next bead on the green side of the ladder.

To "step up" when the weave is established, run your thread straight across the side of the ladder. Your thread should never be angled; you'll know when it's time to step up by seeing that there is no straight cross thread on the side of the ladder. As you tighten the thread, the sides of the ladder will be drawn together.

BASIC THREE-LADDER NDEBELE STITCH

			
			
1 Start with twelve beads; make a ring by going through the first couple beads added	2 Pick up two beads and go through the next bead on the ring	3 Skip two beads on the ring (1 pink and 1 blue) and run through the next	4 Pick up two beads and go through the next bead on the ring
			
			
5 Skip two beads and run through the next bead	6 Repeat Steps 4 and 5 to create the last ladder	7 Skip two beads and run through the next bead (the first on the twelve-bead ring, colored red)	8 Tighten the thread; the four ladders will begin to be perceptible

			
			
9 "Step up" by running the thread through the first of the two bead pair added in step 2	10 Envision three ladders, though you may be using only one color. Pick up two beads, go through the next bead on the same side of the ladder	11 Run the thread through the top bead on the next ladder	12 Repeat Step 8 for the next two ladders (blue and olive)
To "step up" when the weave is established, run your thread straight across the side of the ladder. Your thread should never be angled; you'll know when it's time to step up by seeing that there is no straight cross thread on the side of the ladder. As you tighten the thread, the sides of the ladder will be drawn together.
